12th Colloquium of the Interdisciplinary Research Group on Mediation

Dear Academics in the field of mediation research, dear Colleagues,

as an Interdisciplinary Research Group on Mediation we support young scientists, who wish methodological or substantive exchange with other scientists from many different disciplines, since 2010. In our **12th Colloquium in Berlin** we will open the possibility to discuss your research and to exchange with our members in an international circle. According to this we invite everyone who wants to present their research on mediation in October 2017 to apply with a proposal. Outlines of research projects are welcome as well as the presentation and discussion of planned, current or completed theses (bachelor, master, dissertation, habilitation).

If you find yourself interested in our colloquium, please send your **proposal** via info@forschungsgruppe-mediation.de till **3rd July 2017**

Your **proposal** should include

- A *summary* of your contribution (2-3 pages; including an outline of your research methods as well).
- A *research question* you want to discuss after your presentation or specific issues on which you would like to exchange or get advice.
- A short *description of your personal reasons and goals* for presenting in our colloquium.

Time frame: every applicant who gets the possibility to contribute has 20 minutes to present his/her research (or chosen aspect of his/her research). Afterwards there will be a moderated discussion of 30-45 minutes. You have the possibility to provide all participants with documents beforehand to introduce the subject of your research.

We are looking forward to your application!

See you soon in Berlin,

Dr. iur. Katarzyna Schubert-Panecka, Prof. Dr. phil. Katharina Kriegel-Schmidt, Klaus Schmidt
